

Naam: \_\_\_\_\_

Datum: \_\_\_\_\_

Klas: \_\_\_\_\_

Klasnummer: \_\_\_\_\_

**1**  Los op. Onderstreep wat je eerst uitrekent.

$$\underline{65} - 8 - \underline{5} = \underline{60} - 8 = 52$$

$$\underline{72} - 2 - 4 = \underline{70} - 4 = 64$$

$$\underline{58} - 9 - \underline{8} = \underline{50} - 9 = 41$$

$$\underline{44} - \underline{4} - 4 = \underline{40} - 4 = 36$$

$$\underline{36} - 6 - 2 = \underline{30} - 2 = 28$$

$$\underline{84} - \underline{40} - 2 = \underline{44} - 2 = 42$$

$$\underline{67} - 4 - \underline{30} = \underline{37} - 4 = 33$$

$$\underline{33} - 1 - \underline{10} = \underline{23} - 1 = 22$$

**2**  Los op. Noteer tussenstappen.

$$75 + 7 = \underline{75 + 5} + 2 = \underline{80} + 2 = \mathbf{82}$$

$$38 + 3 = \underline{38 + 2} + 1 = \underline{40} + 1 = \mathbf{41}$$

$$59 + 8 = \underline{59 + 1} + 7 = \underline{60} + 7 = \mathbf{67}$$

$$47 + 6 = \underline{47 + 3} + 3 = \underline{50} + 3 = \mathbf{53}$$

$$36 - 9 = \underline{36 - 6} - 3 = \underline{30} - 3 = \mathbf{27}$$

$$52 - 5 = \underline{52 - 2} - 3 = \underline{50} - 3 = \mathbf{47}$$

$$73 - 4 = \underline{73 - 3} - 1 = \underline{70} - 1 = \mathbf{69}$$

$$84 - 6 = \underline{84 - 4} - 2 = \underline{80} - 2 = \mathbf{78}$$

**3** □ Los op. Gebruik indien nodig splitsbenen.

$25 + 37 = 62$

$59 + 24 = 83$

$67 + 18 = 85$

$36 + 16 = 52$

$55 - 19 = 36$

$46 - 28 = 18$

$63 - 37 = 26$

$84 - 46 = 38$

Ik vond de taak

\_\_\_\_\_

Ik maakte de taak alleen.

Ik kreeg hulp.
